

Superversatile survey-engine: create surveys with ease

2005-05-22 01:01:15 by nukeevangelist

superversatile survey & poll module for PHPNuke & osc2nuke - many features

eklon.com comes up with a very versatile [Survey-module for PHPNuke \(demo 1\)](#) :: [demo 2](#)

Version: 1.0.9b

Filesize: 41.52 Kb

HomePage: dogsempire & eklon.com

or grab it at the fileressource phpnukefiles.com

what can the survey do for you:

Unlimited Surveys. Unlimited questions. Different types of questions in polls with different type of answers of course. Multiple, checkboxes, list, text enter. Almost anything that you always wished to see in poll. Import from standart PHP-Nuke Survey were made. Absolutely secure, and well tuned. Scheduling. Restricted access to voting or to browsing statistics. The most powerfull "anti-cheat" protection, ip, cookie, username, etc tracked. No way to hack the poll or php-nuke through this module. Unfortunately we didn't make two features, the full supported comments to Survey and attaching to articles. This didn't seems to us important, but...

contact the developer of the module dogsempire

and write him an email admin@eklon.com support the further development with your feedback.

see a bunch of demos:
