

Coppermine for Php-Nuke

2005-07-07 19:03:13 by pcnuke

Recently we looked for updates to the Php-Nuke version of Coppermine Photo Gallery. In checking the normal support location:

<http://coppermine.sourceforge.net> -

<http://coppermine.sourceforge.net/board/index.php?topic=13667.0>

We found that this website is no longer supporting, nor offering downloads for the Nuke version. Reading in their forum we found that it was turned over to these locations, but...

<http://www.nukephotogallery.com> (Is no longer online)

<http://www.cpgnuke.com> (Is not supporting the PHP-Nuke version) -

<http://www.cpgnuke.com/Forums/viewtopic/t=3327.html>

Pc-Nuke! is going to provide a location in our Forum for support. Please note that we were not the developers of this program, nor had we been a part of its development. But between everyone who still has an interest in its continuing development, we will offer a location to do that from. Pc-Nuke! also has the most recent/stable version of CPG for Nuke (v1.3.0a) in the downloads section for anyone who needs a copy.

Anyone experienced with this Nuke module, who would like to become a Moderator or Developer of "Coppermine for Nuke", please contact us at this website.
