Amazon Web Services - brand new version of ECS 4 released

2005-07-29 19:56:22 by nukeevangelist

Amazon with new ECS 4.0 Version released :: see some of the news ECS 4.0 Version 27. 07 2005

"XML responses are gzipped before they are returned to the requestor automatically when the request is submitted using Microsoft's Internet Explorer version 6.02 or greater. Other browsers, such as Netscape, may not correctly support gzipped data. To receive gzipped data, browsers must include in their HTTP header the User-Agent string: User-Agent : Mozilla/4.0 (compatible; MSIE 6.0; Windows NT 5.1; SV1; .NET CLR 1.1.4322), and set Accept-Encoding as follows: Accept-Encoding : gzip. This is not a new feature but a clarification of existing functionality."

what are AWS - see Jaap's Free Amazon PHP Scripts: Jaap's Free Amazon PHP Scripts: This page describes PHP scripts that can interface with the XML version of Amazon's Web Services (AWS). It also contains links to more information about PHP and AWS and to sites with other scripts.

Different scripts Each script is reachable under three names. When you call it with the .php extension, the script will be executed and when you call it with the .phps (which stands for PHP Source) or the .php.txt extension you can look at (and copy) the source code."

Test the script :: **Source code** as .phps file(s) :: Source code as .php.txt file(s):

-Demo von Amazoncurl

-Amazon demo 1

-Amazon-hack SourceCode als .txt File

-Amazonlite-Hack
