Vapor Theme Released

2006-07-14 07:47:23 by notafinga

I have finally decided to release my Vapor theme for public download. The Vapor theme was created for php-Nuke Platinum but I am sure it will work for other versions of Nuke.

I have include everything that I used to create the theme. From the actually PSD to the Flash files. Matching phpBB forums with icons.

I hope you enjoy the theme as I will be releasing more in the near future for Nuke and Vbulletin.

Please go to my website www.impact-squad.com and register to download it.
