

Script To Confront Hackers With

2004-02-05 20:19:40 by Raven

I am preparing to release a script to compliment the SQL Injection code fix that I released earlier today. This script will let the hack person know that you have logged their information and are serious about it. In addition, the script will send you, the sysadmin, an email filled with all kinds of information. Click [here](#) to see the script output based on your IP.
