UPDATE! New SQL Injection Issues In Nuke!

2004-02-10 16:23:34 by Raven

Admin Note: I have updated the code. Chatserv and I have spent several hours testing this. Let me know if you find any holes in my present solution.

Without posting the details, there are a couple new SQL Injection exploits out there. I recommend the following code be placed at the beginning of modules/Reviews/index.php and modules/News/friend.php

$test = rawurldecode($_SERVER["QUERY_STRING"]);
if (strstr($test,'%3c')||strstr($test,'
