

RavenNuke[tm] v2.10.01 Core Table File Fix

2007-05-11 19:28:27 by raven

A last minute change to the full release pack contained a typo - sorry! If you have downloaded the full file prior to May 11, 2007 18:20:00 CST and are having problems getting the core tables to load (see [Core Tables wont install - FIX](#)) then grab this [Core Table File Fix](#) and replace the core table sql file.

All of the full download packages have been fixed.
