

Flam MP3 Player for PHP-Nuke BETA

2007-06-19 12:59:23 by forgotz

[Flam Player for PHP-Nuke](#) allows you to serve up **MP3s** from your website, ala customizable Winamp style GUI! No funky server configurations to worry about, just upload and play the music! Download information may be found [here](#) ([club membership required](#)). Click [this link](#) for previews! [DaDaNuke](#) has cleaned this package up quite a bit. *Now incorporates latest release of Flam Player 1.55!* Files better organized for proper upload and tested on PHP-Nuke 8.x, *exclusively* for Club members. **There are a few manual configurations, so please read module documentation first.*

PLEASE NOTE: This project still in BETA phase of development. For script updates, visit our [CVS](#).

[Hosting Module 1.8](#) Final version. This version includes a new whois query system (phpWhois 4.1.0) more effective and more secure, tidy-up code, translate Estonian to English (code and text), added dark templates for better theme compatibility, added default presentation template, you may now configure Hosting Module as a front-end for 3rd party hosting software! This mod optimized for use with PHP-Nuke 8.x.

[SimpleCart 1.0 FINAL!](#) Click [here](#) for screen shots. Version 1.0 now includes unlimited categories and products! If you are not using SimpleCart for your PHP-Nuke commerce solution, then you are working too hard! So easy to install, configure and use. With the included PayPal Button Factory, creating code for your service or product is just a simple click away. Create your own custom store logo and insert into your theme images directory, for more personalization than any version previous.

[Gallery 1.5 for PHP-Nuke](#) is a slick web based photo album written using PHP and fully integrated with PHP-Nuke. Easy to install (it includes a config wizard). Photo management includes automatic thumbnail creation, image resizing, rotation, ordering, captioning, searching and more.

This DaDaNuke modification/enhancement of 1.5 is *exclusive* to DaDaClub Members. We have removed all non PHP-Nuke files and code for smoother integration. Added an admin control panel icon, rewrote install documentation and added two blocks. *Enjoy!*

[GameHost](#) is a complete, fully customizable game server hosting solution for PHP-Nuke. Designed and engineered upon the "Simultaneous Players" pricing model, GameHost allows for the maximum options and budget for you and your clients. This mod optimized for PHP-Nuke 8.x.
