

## Needed help with Hosting module!

2004-06-28 11:42:24 by Maku

The Hosting Module have been a big success from the time it was released in february this year, many people are using it on their PHP-Nuke sites as a small Hosting Company. Many of the users of the Hosting Module are contacting me for improvements - and now is the right time!! I would like to bring the Hosting module up to the next level. The plan is to make a better price system and I like to make some credit card system like PayPal.

I need someone who are interested to help me coding Hosting module.

If you think you can help me and you have some PHP/MySQL coding skills then let me know at [maku\[at\]phpnuke.ee](mailto:maku[at]phpnuke.ee) or in forums.

Also you can see [Hosting module](#) demo in case if you don't know what it is.

Regards,  
Maku
