

## 25 Resources to Get You Started with PHP from Scratch

2013-02-06 23:02:49 by Southern

Not too long ago, Jeffrey wrote an excellent article on resources to get you started with jQuery. Now its time to give some love back to the server side, and become more familiar with PHP.

PHP is a scripting language that is perfect for developing dynamic web pages and applications. You may be a PHP ninja, or perhaps you don't even know what PHP stands for. However, if you plan on or are involved in any kind of web development, you are bound to run into this fantastic and easy to learn web language. Today we will review 25 resources to get you started with PHP.
