

MySQL to HTML

2013-03-13 23:58:26 by Southern

Print all the Data from a MySQL Table in an HTML Table using PHP

What we are using here:

MySQL database:

–MySQL Username: root

–No MySQL Password

–Database Name: PracticeDatabase

–Table Name: Contacts

And 3 echo statements to print the HTML table.

The code:

more [My Coding](#)

Note: Obviously this would need to be adjusted to include the database password, etc.
