

Single File PHP Gallery 4.5.6

2014-12-17 06:08:20 by southern

WHAT IS SINGLE FILE PHP GALLERY?

Single File PHP Gallery is a web gallery in one single PHP file. All you have to do is copy the script to any directory containing images to make a gallery. Sub directories will be sub galleries. Thumbnails for images and directories are generated automatically.

Single File PHP Gallery does not require any configuration or programming skills to use.

By default it looks like this:
