KISSQ - Raven's Stock Quote Updated

2004-07-14 08:37:18 by Raven

v3.5 of KISSQ has been released. This is a bug fix for the stand-alone version and a couple of internal tweaks. Since the same files are used for all versions you should download this update even if you run this as a nuke/post-nuke module. Thanks to user upennballer for finding this!
