

## Preventing Santy Worm On Sites Using Apache

2004-12-26 12:16:36 by Raven

Santy got you down this Christmas? Well, if you are using Apache as your web server, which of course you know you should be, take a look at [Stopping Santy Worm](#). This fix fixes what we know about it so far, based on our user's experience. As they morph, so will we. Continue to stop back as required.
