[KNOPPIX 3.8.2 released - get your version today](#)

KNOPPIX Version 3.8.2 is now available on the mirrors. It's a new update for the 3.8 Cebit 2005 Edition. Changes vs. 3.8.1:

dist-upgrade (all software packages from current Debian/testing)
Kernel 2.6.11 update
the madwifi drivers are back
kwifimanager in KNOPPIX/network menu
OpenOffice 1.1.4 security update
Swapping on knoppix.swp on a NTFS partition should now work
Replaced Fabian Franz' original knoppix-installer with the version from Jörg Schirottke/Kanotix
fixed SCSI drivers in bootimage

get Knoppix and jump into Linux - make your firsts steps in Linux -

KNOPPIX is a bootable CD with a collection of GNU/Linux software, automatic hardware detection, and support for many graphics cards, sound cards, SCSI and USB devices and other peripherals. KNOPPIX can be used as a Linux demo, educational CD, rescue system, or adapted and used as a platform for commercial software product demos. It is not necessary to install anything on a hard disk. Due to on-the-fly decompression, the CD can have up to 2 GB of executable software installed on it.
