

SKV7 Has Been Released!

2005-06-16 08:34:02 by Xiode

I have released SKV7. Xiodestudios picked up on the SK theme series.. If you remember the last default theme on SilentKaos.Com this is it. Also all SK theme support is now handled on XiodeStudios.Com (Xs). I will also be releasing the matching SKShout skin, XsNav skin, and later on the XsShout skin. The XsShout will have both the center block and side block! Expect that in July though. But for now you can view and purchase this theme by the following link:
