

Jinzora 2.2 the mp3 streamer: Jinzora celebrates the 2nd anniversary!

2005-08-24 12:15:50 by nukeevangelist

very good news for [Jinzora 2.2 - Jinzora celebrates our 2nd anniversary!](#) the mp3-streaming module for PHPNuke & osc2nuke is enhances and more powerful now! go and get your [copy of Jinzora 2.2 today](#)

and yes: to sustain the development we can relay on many developer teams. more than 140 000 **friends, users, coders and supporters** build the great network of Nukers.

come brainstorm with the global Nuke community about the future of the developent usage and all you want. At the global nuke-group we believe sharing is the way to create better ideas - ideas that can **move the community, the code, and the world** forward. The ideas are the inspiration -

DENVER, Colorado - April 19th, 2005 Jinzora, the leading provider of web-based media management solutions released of Jinzora 2.2 today.**Jinzora 2.2 feature enhancements**

Can search by 'item ID' in database backends.

Made Item ID's user-customizable.

On-the-fly clip generation

More accurate Now Streaming block.

Support for httpQ3/Winamp5 as a jukebox.

Better handling for multi-genre artists and compilation albums in id3-database

Using an ID3 import, tracks are now handled properly when modified/deleted.

Added full support for PostgreSQL

Made most forms GET-based rather than POST (so the back button works)

Jinzora 2.2 Stats
