

many mods, hacks and blocks - under active development - add your ideas now

2006-04-23 17:43:53 by nukeevangelist

well day by day new modules are released - enhanced or modified. many many modules are in a permanent development: a **critical factor that lies at the heart of the open source development process is the feedback** - your feedback.

if you like some of the modules here then please support as much feedback as possible to keep the good modules and addons in a ever evolving development and permanent state of flux. see the some of them - travel to the sites and if you like what you see then add your feedback to keep the development active - the future begins today - and your are an important part of it - here we go:

see the many modules on hecargo.net - more than 20 Blocks for PHPNuke and the webdever.net - the page with the User-Group-Modul and the nextnet.se - see all various mods - eg. the TopMusic-Modul

- [My News Module v3.0 Released](#) on the [My News Module v3.0 \[demo\]](#)
