

## TegoNuke[tm] ShortLinks 1.0 Released!

2006-10-02 07:04:34 by montego

Since finding out that Bill Murrin's GT-NExtGEn site (aka: "GoogleTap") was taken down and that he had pretty much abandoned further development for almost a year, I decided it was time for someone to take over the "care-and-feeding" of this great concept. Hence, the "birth" of TegoNuke(tm) ShortLinks.

Although the "experts" within the nuke/SEO community are divided on whether having "short URLs" really has any real affect on Search Engine crawling and ranking, this was the primary original reason for the "GoogleTap". Others just like it for better readability of the links by their human "consumers". Regardless of the reasons, nuke site owners all over have their own ideas of why they need / want this feature for their sites, and so, why not oblige them! LOL

Visit Montego Script's [Project Page](#) for more detailed information about this add-on/hack. You may also get it directly from the [Download Page](#).
