

Tabbed block for PHPNuke - wordlwide release - 5 continents

2007-05-11 10:06:37 by nukeevangelist

mental-modz.ngnuke.com with good news :: for phpNUKE Version 6.5 - 7.9.

- [Block: MM-Tabbed Content Center Block Version 1.0 \[click me now\]](#)

This little block acts like four blocks in one it loads four files located in the includes dir just edit them files with content you want displayed then go to admin insert the name of each tab in the admin

controls for the block. Or make up your own files to include just use our files as a guide and then select which file to display in what tab via admin from the drop down box.
