

Who is Online Admin Module Version 2

2008-08-18 19:19:21 by Affamole

What's new in this release.

- * Who is Where has been added.
- * Removed some of the images, so that the display fits, with the new layout.
- * You now have a choice to use flags or abbreviations for countries.
- * Default settings for flags, requires that you have Nuke Sentinel installed.
- * When adding / editing IP ranges, you now have a choice to use a dropdown list for countries, the setting for this is found in Who is Online config.
- * Now as an auto install on firstuse.
- * It will also identify an attempted virus attack.

This module has all the functionality of its predecessors (versions 1 and 1.5).

You can get your copy from our [downloads section](#)

Support for this module can be found at [LD Software Support Forum](#)
