Raven's Customized 7.3 Distribution RC0 Limited Release!

2004-07-15 17:52:31 by Raven

Well, it's finally released! This is the first Release Candidate (RC0). This will be restricted to registered users only and only the first 30 (yeah, I know I said 15 but I got beat up on in private :lol:). Be sure to read the MUST-READ-ME files! I have set up a **Special Bug Reporting Forum** where I ask that you all PLEASE report issues, no where else.

There is also a database installer with its own MUST-READ-ME. Please read that too :lol:.

Update: Okay, I've had enough requests to just let as many download it as desired. But, keep in mind it is still an RC. Be sure to feedback even the positive :)
Be sure to read the sticky posts for fixes AFTER you grab the RC0 files. I will not be altering the RC0 download but will supply the fixes in an RC1 download
